Introduction

This document will include a brief analysis of the project and the individual requirements related to the deliverable D01. The structure of it has been determined following the guidelines provided in the Virtual Learning platform, in the document called “08 Annexes”.

As part of the work to be done regarding “Acme Software Factory”, the individual work consists in a technical requirement and two documentation requirements. This document is part of the mentioned documentation requirements, along with a “Planning and progress” report document.

In the following section the requirements will be discussed, and finally, a conclusion will sum up the document.

Contents

Mandatory requirements

Modify the anonymous menu so that it shows an option that takes the browser to the home page of your favourite web site. The title must read as follows: "⟨id-number⟩: ⟨surname⟩, ⟨name⟩", where "⟨id-number⟩" denotes your DNI, NIE, or passport number, "⟨surname⟩" denotes your surname/s, and "⟨name⟩" denotes your name/s.

This requirement of type functional is rather simple and involves the modification of three different files: menu-es.i18n, menu-en.i18n and menu.jsp, all of them located in the route src\main\webapp\WEB-INF\views\fragments\.

Supplementary requirements

Produce an analysis report.

There is no more complexity in this requirement than understanding the correct structure and content provided in the "08 Annexes" document.

Produce a planning and progress report.

There is no more complexity in this requirement than understanding the correct structure and content provided in the "08 Annexes" document.

Conclusions

The requirements involving this deliverable where clearly defined and understood, and it did not require any deep analysis of them.

Bibliography

Intentionally blank.
