Introduction

This document will include a brief analysis of the project and the group requirements related to the deliverable D04. The structure of it has been determined following the guidelines provided in the Virtual Learning platform, in the document called “08 Annexes”.

As the main part of the work to be done regarding “Acme Software Factory”, the mandatory work consists in the implementation of a test suite for requirement number 11, including a testing report about it.

In the following section the requirements will be discussed, and finally, a conclusion will sum up the document.

Contents

Mandatory requirements

Testing requirements.

Produce as a complete test suite as possible for Requirement #11.

No conflict was found.

Managerial requirements.

Produce a testing report.

It was cleared with the lecturer that no profiling was needed. The performance part of the report will consist of the comparison of real data with hypothetical data obtained by adding 10 % to the original data.

Supplementary requirements

Managerial requirements.

Produce an analysis report.

No conflict was found.

Produce a planning and progress report.

No conflict was found.

Conclusions

The requirements involving this deliverable resulted in minor misunderstandings that were solved with the lecturer in class without any further problem.

Bibliography

Intentionally blank.
